Tertiary Qualifications

Name of the Institution: University of Limpopo
Degree: BSC (Computer Science and Statistics)
Year completed: June 2015

Awards/Certificates

- University of Limpopo Lab Assistant
- Top 10 Third Year Project
- Oracle Certified Associate Java SE Programmer

In Progress

- Oracle Certified Professional Java SE Programmer

High School Qualifications

Last School attended   : Mosibudi High School
Highest Standard Passed   : Matric
Year of Completion   : 2009

Skills and Attributes

- Applications: Microsoft word, Microsoft Excel, Microsoft PowerPoint, Microsoft Access, Outlook Express, MS Project, Flash/Flex Applications

- Programming languages: C++, C#, Java, JAVASCRIPT/TYPESCRIPT, PHP, HTML, CSS, VB.net, SQL, Python, Angular JS, AJAX, ASP.NET, QTP, Selenium

Work Experience

January 2015 – December 2015
Computer Lab Assistant

- Assisting students with Microsoft office and computer related issues
- Tutor students with Introduction to C++, C#, Java
- Invigilate during tests and exams
- Keep the lab maintained

Command Quality
March 2016 – February 2020
Automation Tester at

Duties:

- Analyze the test automation tools used in the project
- Analyzing and understanding the software architecture within the project
- Create test plan or strategies for automation
- Develop and maintain test automation packs
- Analyze the nature of the data and create required test data
- Execute the automation packs
- Report defects or issues found during automation execution

Technologies / Tools:

- Selenium, JAVA, Maven, IntelliJ, Jira,Cucumber,ExtentReporting,Confluence,QC

FNB
August 2016 – December 2018(Client through Command Quality)
Automation Tester

Duties

- Apply, design and develop automated testing strategies and build Automated testing framework
- Develop and configure test automation using automation tools

- Analyze and verify best automated and manual test approaches and execute acceptance testing
- Estimate test accuracy and coordinate with team members for work activities
- Involve in test planning to guarantee adherence of test coverage
- Record test results and report and verify software bug fixes to accept automation criteria
- Coordinate with program and development management teams in product development circle
- Establish test strategy and manual and automated test suites
- Analyze performance test requirements and develop test plans and debug to understand test objective requirements
- Analyze and design the test data required to run the script
- Execute test automation and yield the report
- Defect logging using JIRA, Confluence, QC
- Run sanity testing, Regression pack soon as there are fixes

Project: Powercard Acquiring

Technologies / Tool:

- UFT, TestComplete, JAVASCRIPT/JSCRIPT, TestLeft & Java, IntelliJ, Integrations Test Automation Framework, SQL, JIRA, QC, Confluence, GIT, BAMBOO, Agile Methodology

Application: Flex/Flash, ActionScript, MXML

ABSA
January 2019 – December 2020(Client through Command Quality**)**
Software Test Engineer

Duties

- Analyze all the business requirements and business flows
- Apply Business Process Automation
- Plan and estimation testing according to meet the business requirements
- Design Scripts based on the dynamic business requirements
- Update all the scripts and test cases to changing requirements
- Continually integrates the code base with automated builds
- Test case execution using BDD cucumber that runs the feature
- Defect logging and task management on JIRA and confluence
- Report defects to the stake holders
- Collaborate with all teams for effective testing implementation and strategies
- Prepare and execute regression, smoke testing after fixes

Project: Powercurve (Credit Decision)

Technologies / Tools:

- Java, IntelliJ, Backend Test Automation Framework, Selenium, SQL, JIRA, Confluence, GIT, bitbucket, Springboot Framework, Cucumber, Agile Methodology

Altron BSI
March 2020 – Present
QA Engineer

Duties:

- Analyze the test automation tools used in the project
- Analyzing and understanding the software architecture within the project
- Create test plan or strategies for automation
- Analyze the nature of the data and create required test data
- Integrate Jira with Xray
- Develop A BDD test in Jira through Xray
- Build docker images
- Run the automation in a docker container
- Execute the automation test using Gitlab pipeline/Jenkins pipeline
- Running the test in Kubernetes cluster
- Execute the test and send back report to JIRA for analysis
- Report defects or issues found during automation execution

Technologies / Tools:

- Selenium, Python, Toolium,Maven, IntelliJ, Jira,Xray,Behave,Allure Reporting,Confluence,QC,Git,docker,Gitlab,CI/CD pipelines**,** Kubernetes,JenkinsFile

Project: ICAP(Integrated Customer Administration and Provisioning System)

Other

- I have played a lead role in software development project team of students as part of computer science third year curriculum developing three projects in the last 18 months.
- I have worked on my own Social Network App for my community to share information and updates on what is happening locally and globally.
